NARRATIVE
This survey was performed at the request of J. C. Hyder for the purpose of marking on the ground the corners of the NW 1/4 of the NW 1/4 of the NW 1/4 as shown on this plat. Section 34 was originally surveyed by the General Land Office in 1882 using the "3-mile method" during which marked stones were set at the 1/16 corners. The North line was resurveyed in 1919 during which iron pipes with brass caps were set. A search for the monuments marking the Public Lands Survey System corners was made with the results noted on the plat. These monuments were used to control this survey.
